PROJECTS

- **E-mart**   November 2024
  E-Mart, also known as Electro Mart, is a fully functional e-commerce platform designed to provide users with a seamless shopping experience. The platform features a home page that showcases featured products, best-selling items, The products page displays a comprehensive list of all available items, complete with images, descriptions, and prices. Users can refine their choices by filtering products based on category, price range, or brand. Making it easy for users to explore different product categories.
  Tech: HTML, CSS, JavaScript, Bootstrap, MySQL, PHP

- **Gym Management System**   May 2023
  A Gym Management System is a comprehensive platform designed to streamline gym operations and enhance user experience. The system allows gym administrators to manage customer details efficiently, including personal information such as name, phone number, membership plan and slot bookings. The slot booking feature enables members to reserve their workout sessions. Membership plans are categorized based on duration, such as monthly, quarterly, or annual subscriptions. Additionally, it allows the admin to upgrade or modify a user's membership based on their preferences.
  Tech: C Programming

- **Learning Management System**   December 2022
  The Learning Management System (LMS) is a web-based platform designed to enhance the online learning experience by providing an interactive and structured environment for students. The system is built using HTML and CSS for front-end development, ensuring a visually appealing and user-friendly interface. It enables students to access educational content, watch instructional videos, and take quizzes or tests to assess their understanding. The platform ensures a seamless and engaging educational experience by integrating intuitive navigation, responsive design, and interactive elements that promote effective learning.
  Tech: HTML, CSS, JavaScript
